

ARISTO CAST INVESTMENT CASTING

UPSTREAM. DOWNSTREAM. STREAMLINED.

The highest quality control is achieved with the best in-house management and tools. This includes installing and keeping up with the best machining, cutting, and handling equipment on the market today.

The end results means producing the best quality castings & prototypes faster, and at less cost for our customers—the real bottom line.

Our **Advanced Technology Center** is home to our tooling facility and houses our additive manufacturing equipment, wax printers, and our magnesium casting operation.

Please welcome our latest additions designed to give you more options & flexibility.

AV 0404BA Water Jet 3 Axis System

for cutting everything from precision prototypes to large nested programs in virtually any material and a wide range of thicknesses.
