Investment Casters Take Honors

Top honors in seven categories received awards in the Investment Casting Institute's annual casting contest. Awards were presented at the Institute's 71st Technical Conference and Exhibition in Milwaukee, WI. Awards were given in aerospace, automotive, defense, fine art, oil & gas, and power generation, as well as a new "Best In Cast" overall category.

Awards were presented to Aristo-Cast, Inc. for Automotive; Atlantic C&E for Defense; Virginia Tech for Fine Art; Turbo Cast for Aerospace; TPM for Oil &

Gas; Turbo Cast for Power Generation, and finally **Aristo-Cast, Inc. for the overall Best in Cast category.**

Voting took place via the Whova Event App. All conference and expo attendees voted for their favorite castings.

The casting contest is open to members of the Investment Casting Institute and was designed to recognize foundries which manufacture parts and components that best illustrate and promote the benefits and flexibility of the investment casting process, or

which demonstrate problem solving techniques for the customer. The contest winners and finalists are expected to be recognized in other industry publications.

Submit Your Casting for 2025!
